A. Board Representative update	
B. Continued discussion regarding a new sludge truck and another alternative.	
C. Discussion to extend the clarifier project with Landco Enterprises	67
6. NEW BUSINESS	
A. Discussion for Alliance Water Resources, Base fee- Special Consideration	69-70

B. Discussion and approval of the updated plant inventory and ERP

71-111

### 7. ADDITIONAL DISCUSSION ITEMS

### 8. ADJOURNMENT

THE NEXT MEETING WILL BE FEBRUARY 16, 2021 4:00 PM @ LAKE OZARK CITY HALL

### LAKE OZARK-OSAGE BEACH JOINT SEWER BOARD

Meeting Minutes - November 17, 2020

### CALL TO ORDER:

Mayor John Olivarri called the meeting to order at 4:00 pm on Tuesday, November 17, 2020 at Lake Ozark City Hall.

### **ROLL CALL:**

Mayor, Osage Beach, John Olivarri- Present
Mayor, Lake Ozark, Gerry Murawski - Present
City Administrator Osage Beach, Jeana Woods - Present
City Administrator Lake Ozark, Dave Van Dee - Present
Alderman Osage Beach, Phyllis Marose- Absent
Alderman Lake Ozark, Judy Neels- Present
Public Works Director Lake Ozark, Matt Michalik - Absent
Resident Member, Mr. Gary Hamner - Present

### MINUTES:

Mayor Murawski motioned to approve the meeting minutes of October 20, 2020 his motion was seconded by Alderman Neels and passed unanimously.

### REPORTS:

The October Bill list and Revenue Budget, Expenditure Budget Analysis, Income & Expense Summary and Check Registers and Bank Statements were reviewed. A Motion was made by Resident Member Hamner to approve the documents and pay the bills. His motion was seconded by City Administrator Woods and was passed unanimously.

Alliance Report of Operations: The average daily incoming flow for October was 1.278 mgd. We had 5.8 inches of precipitation measured at the WWTP.

Operationally, the plant's discharge was excellent, with an effluent monthly average BOD of 1.7 mg/l and TSS of 1.7 mg/l respectively for October, which represents a 98.8% or better removal.

The MLSS average for both aeration basins was 5,198 mg/l. The total dry weight sludge inventory for October totaled 277,578 pounds. 45 loads or 166,500 gallons of Bio solids was applied in October. There were 16 tanker loads or 32,000 gallons of septage received for the month.

### APPROVAL OF FLOW CHART

Motion was made by City Administrator Woods to approve the Flow Chart for October. Her motion was seconded by City Administrator Van Dee. Unanimous approval, motion passed.

### **OLD BUSINESS:**

- A. Per Gary Hutchcraft the Headworks roof project is complete and they will be installing the gutters this week.
- **B.** Karri Bell discussed the added amounts for the budget. After a brief discussion with the board a motion was made to approve the budget amendment by Mayor Murawski. His motion was seconded by City Administrator Van Dee. Unanimous approval, motion passed.
- C. Gary Hutchcraft stated he got some prices for a new sludge truck. The first was from Stahly from Bloomington, IL. They build the trucks with all the options for \$221,873. The second was from Irwin Diesel in Barnett, Mo. They priced it at \$197,500 with a \$15,000 trade in for the old truck. The cost after trade in would be \$182,500. Mayor Olivarri asked from a budget standpoint would it be better to push the basin out to the following year and get a sludge truck. Mayor Olivarri suggest budgeting for \$200,000 so if we decide to get the sludge truck then it will already be in the budget. After a brief overview and no other concerns or questions from the board a motion to approve the budget with the proposed changes was made by Alderman Neels, her motion was seconded by Mayor Murawski. Unanimous approval, motion passed.

NEW BUSINESS:		
ADDITIONAL DISCUSSION ITEMS	<u>:</u>	
ADJOURNMENT:		
With no further business to discuss, the n	neeting adjourned at 4:28 pm.	
Approved on:		
Mayor, John Olivarri	City Collector, Trisha Kane

## OUR MISSION

We partner with communities to deliver the finest water and wastewater services available at a competitive price. We are committed to keeping water safe and clean while serving people and taking care of communities with improved technical operations. careful management and financial oversight, and ensured regulatory compliance.

Alliance Water Resources, Inc.

206 S. Keene St. Columbia, MO 65201

### REPORT OF OPERATIONS

LAKE OZARK/OSAGE BEACH Joint Wastewater Treatment Plant No. 1

Month of November 2020

Submitted by Alliance Water Resources, Inc. for the January 2021

Joint Sewer Board Meeting

# SUMMARY OF FACILITY OPERATION

The Lake Ozark/Osage Beach Joint WWTP produced superior effluent quality throughout the month and was in full compliance with effluent limitations established in NPDES Permit No.MO-0103241. No leaks, no spills, and no unauthorized releases to waters of the state. No work related lost time accidents have occurred during the month.

Detailed information relating to plant performance and operations is presented as follows.

## PLANT EFFLUENT QUALITY

	BOD mg/l	TSS mg/l		E.coli Coliform Colonies/100 ml	Ammonia as N mg/L	O&G mg/L	Metals Selenium ug/L
Monthly Average	1.8	2.2	N/A	0.0	0.02	< 4.8	< 1.0
Peak Day	2.2	3.3	7.9	0.0	0.02	< 4.8	< 1.0
Percent Removal	99.4	99.5	N/A	N/A	N/A	N/A	N/A

# NPDES EFFLUENT LIMITATIONS

	BOD mg/l	TSS mg/l	рН	E.coli Coliform Colonies/100 ml	Ammonia as N mg/L	O&G mg/L	Metals Selenium ug/ L
Monthly Average Weekly Average	30 45	30 45	6-9	126 630	1.1	10	3.6
Daily Max				N/A	6.0	15	9.1

# PLANT HYDRAULIC AND ORGANIC LOADING

The average daily influent flow for the month was 1.091 MGD or 36% of Permitted flow with Lake Ozark contributing 16% of the total flow and Osage Beach contributing 84%. Daily influent flow BOD and TSS data is presented in Table A. Daily flow for the month and rainfall are shown in Figure 2. A three-year flow history for each of the two cities is presented in Table B.

Organic loading for the month was 80394 pounds of BOD.

# BIOSOLIDS APPLICATION AND INVENTORY

Plant personnel land applied 18 tanker loads of bio-solids during the month equivalent to a total of 66,600 gallons and 19,255 pounds dry weight solids.

337,709 pounds of dry weight solids have been land applied year to date.

Bio-solids inventory in the storage tanks at the end of the month was 495,000 gallons with a level of 5.0 feet in Tank 1 and 6.0 feet in Tank 2.

### WASTEHAULERS

The plant received 16 loads of septage during the month totaling 36,000 gallons.

### WWTP OPERATIONS

- Decanting digesters and wasting weekly.
- Normal operations.
- We started draining Clarifier #2 on the 2<sup>nd</sup> of November in preparation of the Sandblast and Paint project.

# WWTP MAINTENANCE AND REPAIR

- Performed routine maintenance throughout the month as per Antero Maintenance Data Management schedule. (New version of Operator 10 Software)
- We started having problems with the newer Keene decant pump in the digester lift station flipping the breaker on the 17<sup>th</sup> of November. We pulled it and contacted JCI to come and get it and check it out because there is a possibility it's still under warranty.
- GLW came on got the ducking skimmer arm off Clarifier 2 on the 12<sup>th</sup> of November to replace the pipe, all the bolts and bushings/bearings and will be like new when returned.
- Landco brought equipment in to start sandblasting Clarifier 2 on the 12<sup>th</sup> of November and started on the 16<sup>th</sup>.
- The headworks building re-roof project was completed on 24<sup>th</sup> of November.

#### SAFETY

We conducted our monthly Safety Meeting on Fire Safety, Laboratory Chemical Hygiene Plant
 & Chlorine Handling Safety on the 10<sup>th</sup> of November.

# REGULATORY AGENCY, INSPECTION AND REPORTS

We filled out the new EDMR on the EPA MoGEM website on the 4<sup>th</sup> of December.

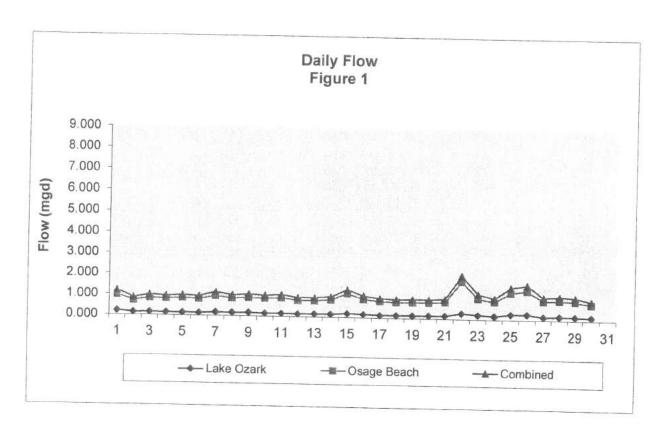

# MISCELLANEOUS AND RECOMMENDATIONS

• We contacted Sourcewell, a government competitive contract bidding site on the 17<sup>th</sup> of November in which the Joint Sewer Board in now a member. We advertised through them that we were looking for a new sludge truck and have emailed 30 + truck vendors through that site for the solicitation of bids for the new sludge truck. We have had at least seven that shown interest and am collecting the bids hopefully in time for the board meeting.

### OUR MISSION

We partner with communities to deliver the finest water and wastewater services available at a competitive price. We are committed to keeping water safe and clean while serving people and taking care of communities with improved technical operations. careful management and financial oversight, and ensured regulatory compliance.

Alliance Water Resources, Inc.

206 S. Keene St. Columbia, MO 65201

(573)874-8080

#### REPORT OF OPERATIONS

LAKE OZARK/OSAGE BEACH
Joint Wastewater Treatment Plant No. 1

Month of December 2020

Submitted by Alliance Water Resources, Inc. for the

January 2021

Joint Sewer Board Meeting

#### SUMMARY OF FACILITY OPERATION

The Lake Ozark/Osage Beach Joint WWTP produced superior effluent quality throughout the month and was in full compliance with effluent limitations established in NPDES Permit No.MO-0103241. No leaks, no spills, and no unauthorized releases to waters of the state. No work related lost time accidents have occurred during the month.

Detailed information relating to plant performance and operations is presented as follows.

#### PLANT EFFLUENT QUALITY

	BOD mg/l	TSS mg/l	рН	E.coli Coliform Colonies/100 ml	Ammonia as N mg/L	O&G mg/L	Metals Selenium ug/L
Monthly Average	2.5	2.9	N/A	0.0	0.04	< 4.8	< 1.0
Peak Day	2.9	3.6	7.6	0.0	0.07	< 4.8	< 1.0
Percent Removal	99.0	98.9	N/A	N/A	N/A	N/A	N/A

### NPDES EFFLUENT LIMITATIONS

	BOD mg/l	TSS mg/l	рН	E.coli Coliform Colonies/100 ml	Ammonia as N mg/L	O&G mg/L	Metals Selenium ug/ L
Monthly Average Weekly Average	30 45	30 45	6-9	126 630	1.1	10	3.6
Daily Max				N/A	6.0	15	9.1

## PLANT HYDRAULIC AND ORGANIC LOADING

The average daily influent flow for the month was 0.861 MGD or 29% of Permitted flow with Lake Ozark contributing 15% of the total flow and Osage Beach contributing 85%. Daily influent flow BOD and TSS data is presented in Table A. Daily flow for the month and rainfall are shown in Figure 2. A three-year flow history for each of the two cities is presented in Table B.

Organic loading for the month was 57536 pounds of BOD.

## BIOSOLIDS APPLICATION AND INVENTORY

Plant personnel land applied 11 tanker loads of bio-solids during the month equivalent to a total of 40,700 gallons and 14,843 pounds dry weight solids.

352,552 pounds of dry weight solids have been land applied year to date.

Bio-solids inventory in the storage tanks at the end of the month was 450,000 gallons with a level of 4.5 feet in Tank 1 and 5.5 feet in Tank 2.

#### WASTEHAULERS

The plant received 33 loads of septage during the month totaling 69,000 gallons.

#### **WWTP OPERATIONS**

- Decanting digesters and wasting weekly.
- Normal operations.

### WWTP MAINTENANCE AND REPAIR

- Performed routine maintenance throughout the month as per Antero Maintenance Data Management schedule. (New version of Operator 10 Software)
- We replaced a float switch in the decant lift station at the digesters on the 15th of December.
- JCI brought the repaired decant lift station pump back on the 18<sup>th</sup> of December and they said that it was not still under warranty.
- When pulling our annual maintenance on the heaters we noticed that the heater in the RAS valve room was not working. We called Catalyst Electric which installed it in 2019 and they came out on the 22<sup>nd</sup> of December and looked at it and said that the phase contactor & thermostat needed replaced. They ordered the parts and came back to install the parts on the 29<sup>th</sup> of December and got it back going. The parts were still under warranty but not the labor.

#### SAFETY

 We conducted our monthly Safety Meeting on Hazard Communication & Five Steps to a Safety Ready Workplace on the 1<sup>st</sup> of December.

### REGULATORY AGENCY, INSPECTION AND REPORTS

We filled out the new EDMR on the EPA MoGEM website on the 6<sup>th</sup> of January.

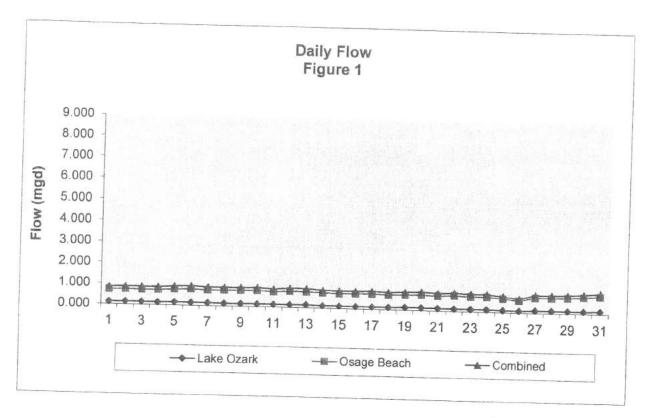

### MISCELLANEOUS AND RECOMMENDATIONS

- We have received multiple bids that are not yet finalized for the purchase of the new sludge truck. Our hope is to have them finalized before the Joint Sewer Board meeting and bring them with us along with bid tabulation sheet for discussion and possible approval.
- Matt & I made a trip over to the Laurie Wastewater Treatment plant to explore another sludge dewatering option but have concluded that it would not be a cost-effective method versus hauling liquid sludge in-house.
- Landco Enterprises requested a 90-day extension for the Clarifier Sandblast & Paint project on the 26<sup>th</sup> of December. The current contract expired on the 31<sup>st</sup> of December 2020.
- You will also find attached an updated copy of our 2021 Plant Inventory List & the 2021 (ERP)
   Emergency Response Plan.
- Last but not least we would like to remind everyone that Alliance will be hosting a New Year's get together right after the Joint Sewer Board meeting at Wobbly Boots Roadhouse in Osage Beach where appetizers & beverages will be served.

## Landco Enterprises

PO Box 275 High Ridge, MO 63049 314-713-7884 Tamborski@att.net

December 26, 2020

To the Joint Board

We would like to formerly request a 90 day time extension for the Clarifier Project (sandblast and paint) at the Lake of the Ozarks facility, although we do not foresee the need for that amount of time.

We have experienced an insufficient number of full days within the manufacturer specified temperature and moisture range to perform sandblasting and the proper application of paint (above 35 degrees for 24 hours with low humidity and dew point).

Sincerely, Charles J. Tamborski

Board of Directors
Lake Ozark/ Osage Beach Joint Wastewater Plant Board
City of Osage Beach
c/o Karri Bell
1000 City Parkway
Osage Beach, MO 65065

#### Dear Board of Directors:

As per the terms and conditions of the Alliance O&M Agreement dated December 12, 2018, the base fee is adjusted on January 1<sup>st</sup> each year to reflect the change in the Consumer Price Index and the other terms of the Agreement.

The Agreement specifies the use of the Department of Labor CPI – All Urban Consumer Midwest – Size Class D, not seasonally adjusted (Series CUURD200SA0). The most recent CPI data used to calculate the Alliance Fee beginning January 1, 2020 was the twelve (12) month period from November 2018 through November 2019.

Accordingly, the base fee beginning January 1, 2021 will use the 12 month period from November 2019 through November 2020. The appropriate indices and resulting contract adjustment is calculated as follows:

```
CPI November 2019 238.850
CPI November 2020 241.310
```

Per the Agreement, the base fee will be adjusted upward beginning January 1, 2021 by the CPI percentage of 1.0%. The calculation of the 2021 Base Contract Fee is as follows:

Current 2020 Monthly Fee = \$25,465.00 Adjusted 2021 Monthly Fee = \$25,465.00 x 1.01 = \$25,720.00

The invoice for January 2021 will reflect the new base fee of \$25,720.00.

#### SPECIAL CONSIDERATION REQUESTED:

In light of the exceptionally low rate of increase in the Consumer Price Index (CPI), Gary and I are respectfully requesting that the Board consider a slight addition to the calculated 2021 Base Fee. Our request is that the Board consider a 1.9% adjustment to the 2020 Base Fee. With Board consideration and approval, the Adjusted 2021 Monthly Fee would be \$25,942.00.

On behalf of Gary Hutchcraft and Alliance Water Resources, thank you for allowing us to serve your communities.

Sincerely,

Ronald L. Smith

Regional Operations Manager Alliance Water Resources

CC: Tony Sneed Gary Hutchcraft

### Lake Ozark / Osage Beach Joint Wastewater Plant INVENTORY LIST January 2021

#### TOOLS

Item No	D. Quantity & Item	* & X = New 2020
1	1 - Craftsman 3 drawer tool box	CE X - NEW 2020
2	1 - Craftsman 5 drawer tool box	
3	1 - Assortment SAE Allen wrenches	
4	1 - Assortment Metric Allen wrenches	
5	1 - 3/8 SAE T Allen wrench	
6	1 - Set 3/8 Allen wrench sockets 1/8 - 1/2	
7	1 - Set SAE & Metric nutdrivers in tool bag	
8	7 - SAE nutdrivers 3/16 - 1/2	
9	7 - Metric nutdrivers 5mm - 11mm	
10	5 - Torx screwdriver assorted sizes	
11	1 - Assortment of straight & Philips screwdrivers	
12	1 - 1/2"staight screwdriver socket	
13	1 - 1/4"deep socket set 4mm -14mm	
14	1 - 1/4" deep socket set 3/16 - 1/2	
15	1 - 1/4" shallow socket set 4mm - 13mm	
16	1 - 1/4" shallow socket set 5/32 -1/2 w/ 2 & 3" extensions	
17	I - 1/4"Ratchet	
18	1 - 40 piece 1/4 & 3/8 socket set, in RAS basement	
19	1 - 3/8" X 1/4" socket adapter	
20	1 - 3/8" deep & shallow socket set 3/8 - 3/4	
21	1 - 3/8"deep socket set 9mm - 19mm	
22	1 - 3/8" Craftsman socket set 3/8 - 13/16	
23	2 - 3/8" 1 1/2" extensions & 1 - 6" ext.	
24	1 - 3/8" Ratchet	
25	4 - 3/8" 6 point sockets 1/4 - 7/16	
26	2 - 3/8" spark plug sockets 5/8 & 13/16	
27	2 - 1/2" Ratchets & 1 set 1/2" extensions 2, 3 & 6"	
28	1 - 1/2" deep socket set 3/8 - 13/16	
29	1 - 1/2" socket shallow socket set 9mm - 21mm	
30	1 - 1/2" socket shallow socket set 7/16 - 1 1/4	
31	6 - KD brand 3/4" sockets, 1 3/8, 1 7/16, 1 1/2, 1 5/8, 1 13/16 & 2 3/4"	
32	1 - 3/4" Breaker bar & 16" extension, True craft	
33	1 - 10 piece ignition wrench set 4mm - 13mm	
34	1 - 10 piece ignition wrench set 5/32 - 7/16	
35 36	2 - Boxed end wrench's 1/2-9/16 & 5/8-11/16	
37	3 - 3/8, 4 - 7/16, 2 - 11/16, 2 - 3/4, 2 - 13/16, 2 - 7/8 combination wrenches

### Lake Ozark / Osage Beach Joint Wastewater Plant INVENTORY LIST January 2021

#### TOOLS

TOOLS			
Item No.	Quantity & Item	* & X = New 2020	
44	6 - electrical screwdrivers, 3 straight & 3 philips head		
45	2 - wire stripers		
46	1 - pair lineman pliers		
47	1 - pair needle nose pliers		
48	1 - pair side cutters, 6"		
49	3 - 10" Vise grip pliers, 2 curved jaw & 1 straight		
50	2 - 6" Vise grip pliers, 1 curved & 1 needle jaw		
51	1 - yellow handle tin snips		
52	1 - 12" crescent wrench, Craftsman		
53	3 - pipe wrenches, 18", 24", & 36"		
54	1 - 10" Stanley level		
55	1 - 24" Craftsman level		
56	2 - 25' Task Force tape measures		
57	2 - 6" pocket metal rules		
58	1 - points file		
59	1 - file assortment		
60	1 - rasp file		
61	2 - Concrete trowel		
62	1 - feeler gauge		
63	1 - tool bag		
64	1 - ice pick		
65	1 - punch & chisel set		
66	1 - 2" C clamp & 2 - 4" C clamps		
67	2 - putty knives		
68	1 - parts brush		
69	1 - ball peen hammer		
70	I - 4lb shop hammer		
71	1 - claw hammer		
72	1 - 10 lb sledge hammer		
73	1 - rubber mallet		
74	1 - hacksaw		
	3 - wire brushes		
	1 - tire gauge		
77	1 - 6" square		
	2 - rag pullers		
	1 - crow bar		
	1 - garden rake		
	1 - round point shovel		
	1 - flat shovel		
	1 - 10lb straight bar		
	1 - pick		
	1 - anti freeze tester		
86	1 - flat bar		

#### TOOLS

Item No.	Quantity & Item	* & X = New 2020
87	1 - Craftsman 28 pc. tap & die set	
88	1 - Black & Decker drill & driver set	
89	1 - 7" carbide masonry drill bit set 3/16 - 3/4	
90	3 - masonry bits, 1/4, 5/16 & 3/8	
91	1 - Black & Decker metal drill bit set, 1/16 to 1/2 & HS bits assorted sizes	
92	2 - gear pullers, 1 large & 1 small	
93	1 - Black & Decker 3/8 variable speed drill	
94	1 - mini copper tubing cutter	
95	1 - PVC cutter	
97	1 - 1/2" Electric Impact Wrench	
98	1 - Sandblaster w/ 24ft of hose & 2 bags of blasting material	
99	1 - Hitachi hammer drill*	
	SLUDGE TRUCK TOOLS	
100	1 - grease gun	
101	1 - 20 piece Stanley SAE Comb. end wrenches 1/4 - 7/8	
102	1 - Set Comb. End wrenches 8mm - 18mm	
103	1 - Rubber maid tool bag	
104	4 - Stanley flathead screwdrivers	
105	2 - Stanley phillips screwdrivers	
106	AC Delco T20x4" star screwdriver	
107	AC Delco 2x1 1/2" phillips screwdriver	
108	AC Delco 1/4"x1 1/2" slotted screwdriver	
109	13 oz. Wood handle claw hammer	
110	RayOVac industrial flashlight	
	25' task force tape measure	
112	7 WR vise grip	
113	10 WR vise grip	
114	Stanley lineman pliers 84-113	
115	Stanley wire cutters 84-060	
	Stanley crescent wrench 85-763	
117	1 - Set of wheel chocks	
118	1 - log chain	
	1 - air hose	
120	1 - assortment Buse fuses & 1157 bulbs	
101	MISCELLANEOUS EQUIPMENT	
	1 - Ryobi 18 volt Drill, Circular Saw, Recip saw, Flashlight, Vacuum Combo K	Lit w/2 batteries
	1 - Millermatic Wire feed welder w/helmet & gloves	
	1 - 10-3 50ft & 1 - 10-3 100ft Extension cord	
	4 - metal lockers in men's restroom	
	2 - metal lockers in women's restroom	
	1 - plastic mop bucket w/wringer	
127	l - Gorilla ladder MPX-22	

## MISCELLANEOUS EQUIPMENT

Item No	Quantity & Item	
128	1 - 4' step ladder, fiberglass	* & X = New 2020
129	1 - 6' step ladder, fiberglass	
130	10' stepladder, wood	
131	24' 300 lb rated extension ladder, aluminum	
132	24' 300 lb. rated extension ladder, fiberglass	
133	2 - set of plastic saw horses	
134	1 - 6"x 10' suction hoses	
135	2 - 6" x 25' suction hose	
136	1 - 4" x 60' suction hose	
137		
138	1 - 4" x 15' discharge hose @ septic unloading station 1 - Schumacher battery charger model SE-82-6	
139		
140	<ul> <li>I - DieHard 12 volt automatic battery charger/engine starter model 28.71331</li> <li>I - 100' extension cord</li> </ul>	
141	1 - 50' extension cord	
142	1 - 1 gallon plastic gas cans	
	2 - 5 gallon steel safety gas cans	
144	1 - misc. log chains, headwork's tool room	
	3 - 50'x1 1/2" fire hoses with 2 nozzles	
	5 - Garden hoses	
	1 - mechanic creeper	
	2 - Craftsman gas leaf blowers, one not running	
149	1 - Craftsman 4 cycle weed eater	
	1 - Stihl weed eater, not running	
	1 - Kawasaki weed eater, not running	
	1 - cherry picker (engine hoist)	
	1 - 9 gallon portable air tank	
	1 - Campbell Hausfield 26 gallon air compressor	
	1 - CH air drill	
	1 - CH air ratchet	
	1 - CH air grinder	
	1 - CH air impact wrench	
	1 - CH air chisel w/4 chisels	
	1 - air tire inflator	
	1 - Pro-Arc oxy-acc torch kit & tanks	
	1 - Pro-Force 33 paint sprayer	
	1 - 15 gal 12 volt portable sprayer	
	1 - 60gal Ingersoll Rand in UV building	
	1 - 3 ea. grease gun	
166	I - Cowhbian 5" multi bench vise	
	3 - shop vac's	
	2 - drum dollies	
169	- Commercial Elec. Amp meter, HDSA 500	
	- Commercial Elec. Multi meter, HDM 4100	

# MISCELLANEOUS EQUIPMENT

	MISCELLEAN EGGS EQUIT MENT	
Item No.	Quantity & Item	* & X = New 2020
171	2 - insulated fuse pullers, 1 large & 1 small	
172	1 - GB circuit tester	
173	1 - 3/8 hammer drill	
174	1 - Skil 14.4 drill kit, w/ battery & charger	
175	1 - Black & Decker bench grinder	
176	1 - Black & Decker hand grinder, 4 1/2"	
177	1 - 115V 3/8 VSR Drill/ Driver	
178	1 - propane torch, elec. Start	
179	1 - strap 1 ton come along	
180	2 - chain come alongs, 1 ton & 3 ton	
181	1 - cable come along, 1 ton	
182	1 - 2 ton floor jack	
183	1 - 12 ton high lift jack	
184	2 - yellow air hoses	
185	1 - 100gal. Portable Diesel fuel tank	
186	1 - Fluke T5-1000 Volt/Amp meter	
187	1 - wheel barrow	
188	1 - garden cart	
189	1 - Garden power 65ft. 5/8" Auto-Retractable Garden Hose reel	
190	1 - portable hand work light	
191	1 - portable work light stand w/ dual mounted lights	
192	3 - Strong Arm electric winches for clarifier skimmer baskets	
193	1 - Strongway electric hoist for lift station pumps*	X
194	1 - AMT 3" trash pump w/wheel kit	
195	1 - 3" 50ft & 1 - 30ft suction/discharge hose w/couplings	
	1 - North Star 3000 PSI Steam and Hot Water Pressure Washer	
	1 - Warn 120 volt Winch/Hoist for pulling UV channel basket	
198	1 - Chapin Homepro backpack sprayer	
199	OFFICE INVENTORY  1 - wooden desk	
	1 - wooden desk 1 - metal desk	
	4 - Office chairs	
	3 - file cabinets, 1 - 4 drawer & 2 - 2 drawer	
	1 - 3 shelf bookshelf	
	1 - PC, w, speaker in monitor, keyboard, and surge arrestDELL 1 - MFC-7360N Brother copier / printer	
	1 - conference table	
	27 - folding steel chairs	
	3 - Phones (cradle style)	
	I - Fellowes paper shredder	
	- Bissell vacuum cleaner	
	- Emerson TV / VCR Combo (for training)	

		* & X = New 2020
212	1 - Magic chef refrigerator	
213	1 - Culligan water cooler	
	CONSUMABLE MATERIALS	
214	2 - 500 Gallon propane tanks, w/ 800 gallons as of 1/8/21	X
215	1 - 700 Gallon diesel fuel tank in Generator, w/ 700 gallons as of 1/8/21	X
	VEHICLE'S	
216	1 - TRYN SP-575X-1 Mini Pro Tailgate Spreader SN#190730300540SP-575X	<b>(</b> -1
217	1 - 2018 Ford F-250 w/Knaplied snow blade vin# 1FTBF2B66JEC64283	
218	1 - 1994 Volvo White GMC Sludge Truck vin# 4V2JCBE75R833094	
219	1 - Kabota ZG123S 48" Zero-Turn Mower	

# LABORATORY EQUIPMENT

	LABORATORT EQUIPMENT
Item No.	Quantity & Item
220	1 - OHAUS adventurer analytical balance
221	1 - Orion & 1 no name brand bench top electrode arms
222	1 - USA Bluebook electric stirrer
223	3 - Isco Auto samplers, 1 - NI-CAD batteries, 1 small & 1 larger charger
224	1 - Isco Auto sampler pump
225	1 - Hach Sension+ MM340 Ammonia meter* & probe
226	1 - Hach HQ411D pH/mv meter & probe with stand
227	1 - Allied stirrer and hot plate
228	1 - Vector spotlight, for discharging Isco batteries
229	2 - VWR ASTM certified / calibrated thermometers
230	2 - Nalgene desiccators
231	1 - muffle furnace-Therolyne
232	1 - vacuum pump-Fisher
233	1 - sterilizer-Electric Steno Clave
234	1 - centrifuge-IEC centrifuge, not in use
235	1 - Incubator-Fisher ISO temp
236	1 - drying oven-Fisher ISO temp oven
237	1 - portable D.O. meter-YSI 550-A
238	1 - BOD meter & probeYSI 5905, not in use, obsolete
239	1 - BOD Incubator- Fisher low temp model 307
240	1 - microscope-Micromaster
241	1 - Lab refrigerator-Marvel Division
242	2 - timers-West Bend
243	1 - Hanna portable pH meter
244	2 - Hach HQ40D meters, 1 with LBOD probe & 1 w/ Rugged LDO probe
245	1 - Hach Distillation Glassware set for Ammonia
246	1 - Thermo Hot plate for distillation
247	2 - Igloo Ice Maker for Samplers

# The Lake of the Ozark Regional Wastewater Treatment Plant #1

Emergency Response Plan, Emergency Operations Plan, Emergency Action Plan, and Fire Protection Plan

#### January 2021

#### Purpose

The purpose of the Emergency Response Plan (ERP) is to provide for an organized response to an emergency situation at the Lake of the Ozarks Regional Wastewater Treatment Plant #1 (WWTP). The primary emphasis in the ERP is to minimize risk to public health, and to minimize damage to private and public property. The secondary emphasis in the ERP is to provide the best possible wastewater treatment in the event of an emergency situation.

#### Purpose of this Manual

This Emergency Response/Operations Plan Manual has been designed to assist in the first hours and days after a major disaster has damaged or destroyed the wastewater treatment system for the Lake of the Ozarks.

The manual is set up into several chapters of which some are in checklist format to assist you in prioritizing and planning your response.

The manual is designed to comply with MoDNR 10 CSR 60-12.101 Emergency Response/Operations Plan.

Updated/Reviewed for Accuracy Annually:

Date: 1/8/21	2021	Initials:	GH

# Preliminary Damage Assessment Checklist

Call key plant personnel, starting with Contact Order on page 3 of this ERP. Determine need for additional personnel.
Notify fire department if appropriate.
Identify person in charge at the site.
Make preliminary site evaluation, determine extent of physical and operating damage (Check piping, pumps, basins, structures, look for seepage, leaks, cracks, landslides, broken pipes and drains).
Check for downed power lines and propane gas odors and notify Ameren UE if necessary.
If damage appears intentional, notify police (site may be a crime scene).
Take steps to keep public safe, use barricades, etc. Remove obstacles that will prevent emergency vehicle access.
Person in charge should contact key Joint Sewer Board Representatives to inform of situation and discuss further anticipated notifications.
If environmental damage is likely, notify MDNR.
If public health is at risk, notify local health department.
Develop mitigation and recovery plan.

## 2. Safety Equipment

- a. Full body harness (2) (Admin. Bldg.)
- b. Lanyard & spreader bar (Admin. Bldg.)
- c. Tripod and hoist (Admin. Bldg.)
- d. 4-gas Drager X-am 2000 gas detector (Admin. Bldg.-office)

#### 3. Other Equipment

- a. Ford 6" trash pump, City owned (Lake Ozark)
- 60' of 6" suction hose, City owned (Lake Ozark). 60' of 4" suction hose w/ 4 to 6" adapter.
- c. AMT 3" trash pump, w/ 30' and 50' hoses w/ quick couplers.
- d. Ford F250, 4WD pickup truck w/ snow blade & sand spreader
- e. Volvo White GMC Sludge pump truck w/ 3700 gallon tank.
- f. GMC 4 Wheel drive Field pump truck with 1600 gallon tank w/ 20' of 6" suction hose.
- g. Wire feed Welder (1)
- h. Oxygen and Acetylene torch set w/ 50' hose.

#### C. Command Post Designation

- The command post for the WWTP shall be in the Administration building-office at the WWTP. If conditions make this impossible, then the command post shall be located at a designated site provided for by the Joint Sewer Board.
- All communications shall be coordinated through the City.

#### D. Communications Policy

1-Report all emergency situations (if possible), to Gary Hutchcraft

If Gary cannot be contacted, then call the people on the following list until someone is notified of the emergency situation.

	3 ,	Work	Mobile	Home
	Christopher Beals	573-365-0455	816-745-1405	
•	John Hornback	573-365-0455	573-480-4065	573-369-2761
6	Lonnie Madole	573-378-5737	573-789-5242	
	Kevin Klein	573-378-5737	573-378-8510	
•	Josh Thompson	573-364-8790	573-308-6229	573-762-9941
0	Ron Smith	573-874-8080	660-492-2144	
0	Tony Sneed	573-874-8080x302	256-278-1264	
•	Tim Geraghty	573-874-8080 x229	314-575-4738	

What qualifies as an emergency situation?

Generally speaking, an emergency situation can be anything that has the potential to cause danger to human health, and or damage to property. We can easily extend the meaning of an emergency situation to be anything that has the potential to cause damage to the environment. The practical application thus being: an emergency situation is any situation that has the potential to cause a violation of the NPDES permit.

The NPDES permit is a combination of both numeric and narrative standards that are developed to protect the designated uses of the stream that the Lake of the Ozarks Regional WWTP #1 discharges into. The permit also contains standards that cover wastewater discharges from the collection system.

The following outline lists some (not all) of the situations that qualify as an emergency situation that should trigger notification.

#### Surcharge

Wet Weather

Dry Weather

Loss of treatment

Power Fail

Equipment damage

Toxic Shock

Short Circuit

Sabotage

- 2 In an emergency situation the following information shall be communicated:
  - What has been damaged,
  - If no damage, why is there an emergency,
  - Is there a threat to public health,
  - Is there damage to public and/or private property,
  - Has treatment been affected.
  - Are NPDES permit violations occurring,
  - Will NPDES permit violations result from the emergency,
  - Are there any safety issues due to the emergency.
  - Are help and/or equipment needed to eliminate the emergency?

3-The MODNR will have to be contacted when Section B, 2A-B, (noncompliance notification standards, published in the 'Standard Conditions for NPDES Permits'), have been reached. A copy of these standards is included in the text of this plan on page 24. Follow the directions listed in the 'notification standards'.

MODNR Department Central Office Phone: 573-751-3443

Central Field Operations 573-522-3322 or Environmental Emergence Response 573-634-2436 P.O. Box 176

Jefferson City, MO 65102-0176

Always notify the Joint Sewer Board and Corporate before MODNR notification. When notifying the MODNR always record the name of who you are talking to, and the time and date of the notification. Give the following information: what the violation is per notification standards, and what our actions are to eliminate the violation. Be factual; do not assume anything. Finally, find out if the DNR requires written notification concerning the violation.

In the 2 drawer file cabinet by the copier, the file that is marked "DNR Bypass forms" there are two report forms that need to be filled out in any bypass situation, and/or any operations - treatment emergency that reaches notification standards. One report form (Wastewater Bypass Report Form) is for the MODNR, and the other report form (Deviation Notification Form) is for AWR corporate. These forms are also included in Appendix 8 of this manual.

## E. Emergency Action Plan

- Procedures for reporting a fire or other emergency situations.
  - 1. Call 911 and report the situation
  - 2. If the land line phones don't work, try cells and direct connects
  - 3. Determine if a response is safe and or necessary
  - 4. Determine whether or not evacuation is necessary
- Procedures for emergency evacuation including type of evacuation and exit route assignments.
  - If an emergency evacuation is necessary follow the exit routes posted in the buildings.
  - All evacuees shall meet at the main entrance gate, and determine what action needs to be taken, and if support can be given to emergency response personnel.
- Procedures to be followed by employees who remain to operate critical plant operations before they evacuate.
  - If employees need to stay behind to operate critical plant operations, they shall establish communications with an employee who has already evacuated. Communications shall be on a routine basis with information conveyed relating to the safety of the remaining employee, current operation conditions, safety related conditions, etc.
  - The employee who stayed behind shall evacuate if life threatening conditions present themselves, or if there is evidence that a condition may become life threatening.
- Procedures to account for all employees after evacuation.
  - As specified above, all employees who evacuate shall meet just outside the entrance gate. An accounting of all employees shall be determined.

#### Assignments

- 1. The on-call operator shall be designated as the employee who stays behind.
- 2. The local manager shall ensure that communications are being carried out with the employee who stayed behind
- 3. The local manager is responsible for making an accounting of all employees.

#### F. Fire Protection Plan

- Assure that hazardous accumulations of combustible waste material are controlled.
  - 1. Place used rags in the metal used rag container.
  - 2. Keep trash picked up and trash cans empty on a regular basis.
  - 3. Complete and turn in the required hot work permit for all welding or grinding activities.
  - 4. Keep a 30 minute fire watch after any welding operation has ended.
  - 5. Keep combustible liquids in the storage cabinets. Keep the cabinet doors closed.
- Identify high risk areas and develop plans to minimize potential fire hazards.
  - The highest risk area for fires is in the shop. Plans to minimize the risk of a fire include: use of storage cabinets for gasoline, paints, etc. Use of metal trash cans with lids for the storage of used shop rags. And the control of trash accumulation on the floor and in the trash cans.

# G. Emergency Identification and Analysis

Emergency	Analysis
Severe storms, high wind, lightning, floods.	<ul> <li>Damage can range from low to medium depending on severity of storm.</li> <li>Electrical supply, electrical pathways, exposed equipment and equipment located in underground vaults (when flooding is a concern), are most susceptible to damage.</li> </ul>
Severe cold, ice storms, blizzards.	<ul> <li>Damage can range from low to medium depending on severity of conditions.</li> <li>Temperatures below -15° F are cause for emergency response with outside equipment and with buildings that require additional heat to protect equipment with exposed moving parts. In these conditions always make sure the lift stations lids are closed.</li> <li>Ice storms and blizzards can cause damage to the electrical supply and also hinder access to the Wastewater Treatment Plant.</li> </ul>
Earthquakes.	<ul> <li>Damage can range from low to high.</li> <li>A major earthquake has the potential to cause extensive damage to all phases of wastewater collection and wastewater treatment since a lot of equipment is located underground.</li> <li>Damage can also occur in weak links of a collection system or weak areas of concrete basins, which may not be apparent by visual observation.</li> </ul>
Sabotage, civil unrest, riots, terrorist attacks.	<ul> <li>Damage can range from low to high on electrical supply, and any equipment that is exposed and can be easily damaged (i.e. bar screen, electrical control panels, lift stations, lab-office building equipment, etc.).</li> <li>Measures to prevent damage from terrorist attacks are detailed in the following section on facilities security.</li> </ul>
Air borne chemicals, water borne chemicals, toxic chemical spills, weapons of mass destruction.	<ul> <li>Damage to bacteria mass in the treatment process, and can also affect health of treatment personnel.</li> <li>Caution should always be taken when confronting a chemical -biological emergency.</li> <li>If weapons of mass destruction are suspected to have caused the emergency, then treat the affected area as a crime scene and call local authorities.</li> </ul>

## H. Facilities Security:

The following topics should be analyzed and developed to increase security to its highest Level at the WWTP:

- 1. Detection (the ability to detect a security threat),
- 2. Access (deter access to the WWTP),
- 3. Delay (provide a layered barrier system to delay access to the WWTP)
- 4. Respond (develop an organized response to a breach in security)

# Priority Equipment and Processes.

The following list is a list of equipment and/or processes in the order of relative importance to the wastewater treatment process. The list shall be used as a guide when determining what equipment and/or processes need to be placed into service first, second, and so on, when there is a widespread emergency. The list is organized into two categories: WWTP mechanical (piping and valves), and equipment (which includes structures).

Mechanical	Treatment Equipment
Raw sewage force mains to WWTP.	Treatment Equipment  1. Oxidation Ditches (at least one aerator per unit that WW is entering)
2. Gravity thru Oxidation Ditches.	2. Final Clarifiers (1,2 & 3).
3. Gravity mains from oxidation ditches to final clarifiers splitter boxes.	3. Adjustable weir gate valves at basins
4. Gravity to Clarifiers.	Adjustable weir gate valves at splitter box for Clarifiers
5. Sluice gates in Oxidation Ditches and UV channels for draining purposes	5. Lift Station between aeration basins
6. RAS force main back to Ditches	6. RAS electric pinch valves in middle room of headwork's bldg.
7. RAS waste from clarifiers	7. Waste valves
Sludge waste force mains to sludge storage cells.	8. Waste valve pit and waste manhole on top of hill and at bottom by Digesters

#### J. Emergency Response Guidelines.

- General Guidelines.
- Analysis and Planning. If time permits conduct an initial meeting with staff
  to assess an expected emergency situation. Outline potential damage to
  specific equipment, processes, or structures. Plan a strategy to prevent
  potential damage and/or minimize its effects on public health, property, and
  wastewater treatment.
- Inspect. After the onset of an emergency, inspect WWTP for damage.
   Follow all applicable safety regulations and lock out and secure any unsafe areas.
- Communicate. Document damaged units, and unsafe areas. If damage creates immediate threats to public health, properties, and/or wastewater treatment, contact Joint Sewer Board, AWR, and State; to advise of situation. Consult communications policy on page 4.
- React. Execute activities to eliminate threats to public health, property, and/or wastewater treatment. Refer to 'Damage and Response' section of this plan to help direct the activities. Collect necessary samples, as NPDES permit requires. Develop best treatment plan in the event of an emergency that disables one or several process units. Contact City's for emergency purchasing authority. Contact vendors for needed supplies.
- Communicate. Update the Joint Sewer Board, AWR, and State as needed.
   Log important observations and actions.
- Repair. Make necessary repairs to bring damaged units back up to full operations.
- Review. Review emergency response with staff and make adjustments in the ERP if necessary.

In a widespread emergency, AWR staff will be required to assist the Joint Sewer Board. In this situation, one staff member (two staff if there are safety concerns), will be responsible for implementing the initial steps of the above guidelines.

## Section II

### Damage and Response

Damage to the WWTP can result in threats to public health and/or damage to private or public property. Damage can also result in an interruption of wastewater treatment in various degrees. The WWTP are constructed of several process units that are linked together to convey and treat the wastewater. This section looks at the possible effects of damage to these process units, and what type of responses can be made to limit the threat to public health, property damage, and the continuation of wastewater treatment.

#### Process Unit:

#### Main Power Supply

#### Key Components:

3 phase power lines from sub, pole and pad mounted transformers feeding MCC1 which feeds MCC2. When power goes out the standby/backup generator will automatically come on and feed both MCC1 & 2 but everything will not come back on automatically. Manually restart all equipment that was going before outage if capable following every precaution mentioned in this ERP.

### **Effects of Damage**

Power lines-

- In severe cases one or all of the power lines can be severed which will result in power loss to the WWTP.
- If power lines are severed upstream from the pole or pad mounted transformers then power loss will affect MCC1 & MCC2
- Power loss of more than 8 hours has the potential to cause the ditches to go septic and the sludge in the clarifiers to surface and bulk and/or cause a violation of permit limits.

#### Transformers-

 Loss of one or more of the pole or pad mounted transformers will cause power loss to MCC1.

#### Response

Power lines-

- Call Ameren UE and find out how soon they can make it out. Once you have a response
  then call the Local Manager and inform, then let him make the decision on what to do
  next.
- At the least the employee on emergency Duty must stay until Ameren UE restores power or a relief operator shows up to relieve him and once power is restored bring one piece of equipment back on line at a time.

#### Transformers-.

• Checks to see if fuses have blown or flipped down on the pole mounted transformer by the main power control room at the Headwork's Bldg. and inform Ameren UE of it. If that is what it is then, it will be an easy fix for them. Never try to attempt to flip fuses back up on your own, Let Ameren UE do it.

#### Process Unit:

#### **Head Works**

#### Key Components:

MCC1 and MCC2 control power and control equipment (unit specific), mechanical bar screens, grit chamber, grit solids pump, RAS pumps, non-pot and potable pumps.

#### Effects of Damage

In general-

 In any case, if damage is severe enough to disrupt either the mechanical bar screen, and/or the grit chamber/grit solids pump; both units can be bypassed. This condition is acceptable for a few days.

#### Response

In general-

- If units must be bypassed, do so immediately by placing a stop gate in its appropriate positions; this job requires two people.
- Install the manual bar screen as needed.
- Do not allow flow into the grit chamber if the paddle drives, grit solids pump, are not working, for more than couple of days.
- If damage results in the loss of the heater then emergency heating needs to be set up in sub-freezing weather.
- Pump out the grit chamber if it will be out of service during sub-freezing weather and are experiencing icing conditions.
- If necessary, also pull the Auto bar screen up and install manual bar screen; this will require getting in influent channel and hooking come-along to eyelets on bottom of bar screen and lifting it up out of the way so you can install the manual screen. This job requires at least 2 people.
- When bringing units back into service the mechanical bar screen shall receive top priority over the grit chamber, grit solids pump.

#### Process Unit:

#### Secondary Treatment

#### Key Components:

MCC1 and MCC2, aerator control box, control power and control equipment, oxidation ditch 1, and oxidation ditch 2.

#### Effects of Damage

In general-

- MCC1 power center is utilized to operate the aeration equipment.
- The most critical aeration equipment are the motors and gear boxes that drive the Carrousels. At least one should be in operation at all times.
- Loss of the oxidation ditches will result in at least a 60% reduction in treatment.
- Loss of air to the bacteria in the oxidation ditches for more than: 4 hours in the summer, and 24 hours in the winter, will create anoxic conditions and could possibly kill the bacterial population.

#### Response

#### In general-

- The oxidation ditches can, (one at a time), be isolated from the WW treatment process.
- If all aeration equipment is down make arrangements to get a minimum of one carrousel per ditch in operation ASAP.
- Note: If there has been a toxic spill in the collection system, one of the oxidation ditches
  can be made ready to accept the toxic waste, and then taken out of the process to further
  treat the toxic waste.
- If bacterial population is killed, plan to get seed from Camdenton or other surrounding communities.

#### Process Unit:

#### Clarification

#### Key Components:

Clarifier splitter box

MCC1 feeds MCC2.

Final clarifiers 1, 2, 3

Control power and control equipment.

Clarifier drive units, skimming mechanism, scraper mechanism, sludge withdrawal, RAS pumps, RAS force main, WAS force main, and clarifier gravity drain

#### **Effects of Damage**

#### In general-

- Severe cold is the most likely threat to damage the clarifiers.
- Earthquakes could cause considerable damage to underground piping.
- There is one inlet line and one drain line on clarifiers #1 and #2, with no drain on #3, so it
  is appropriate to state that any damage to underground piping could result in total
  disruption to the function of the clarifiers.
- Damage to sludge withdrawal equipment will disrupt the return of sludge to the oxidation ditches and thus stockpile the sludge in the affected clarifiers.

#### Response

#### In general-

- In severe cold, the skimming mechanisms should be modified to minimize potential damage to the skimmer arm/rake mechanism.
- A means of maintaining surface water disturbance (i.e. water sprays) is necessary to keep the surface from forming thick ice.
- Constant attention shall be given to the clarifiers during extreme cold conditions.
- Emergency pumping may be required to remove sludge from the clarifiers. This can be accomplished with the sludge pump truck on a routine interval. Clarifiers 1, and 2, should be placed back into service first.
- Note: Clarifier 3 cannot be drained dry by means gravity drain mains; it has to be pumped dry by RAS pumps.

#### Process Unit:

## RAS Pump Building (basement)

#### Key Components:

MCC1 feeds MCC2, control power and control equipment, discharge piping, and check valves, discharge valves, force main, pumps/motors.

#### Effects of Damage

#### Main power-

 Will disable pumps and may lead to the stockpiling of sludge in the clarifiers. If left unchecked sludge can be discharged into the receiving stream.

#### Control power, control equipment-

 Will disable pumps in the automatic mode. Pumps can be operated manually (unless control transformer is damaged).

#### Piping and valves-

Damage will inhibit operation of pumps.

#### Pumps and motors-

- Can disable one or all pumps.
- There are five pumps in the RAS pump building, which should greatly minimize the chance of losing total pumping capacity.

#### Response

#### Main power-

- If there is a power loss feeding the pump building then check to see if you have lost a leg of your 3 phase power in MCC2?
- If there is an interruption of main power within the control panel then isolate the problem (motor starter contacts, thermal overloads, fuses, etc.) and correct.
- Be aware that high amps indicate a motor overload (shorted windings, bad bearings, pump obstructions, etc.), and should be corrected before placing any motor back into service.

## Control power, control equipment-

- If pumps operate on hand but not on auto then there is a problem with either the control power and/or the control equipment.
- Check control voltages.

#### Piping and valves-

- If there is damage to suction piping and/or check valves, then the damage shall be repaired, (ASAP if all pumps are affected; emergency pumping may have to be provided in this situation).
- If damage to piping and valves occurs downstream from the check valve, the damage should be repaired as required to allow RAS to be conveyed under pressure.

#### Pumps and motors-

If all pumps are disabled then isolate the problem with each pump and plan corrective action based on which pump can be repaired the fastest. Make repairs to that pump then proceed to the next, etc.

#### Process Unit:

#### Sludge Digestion and Sludge Storage

#### Key Components:

Motor control center at digesters, positive displacement blowers air suction and discharge piping, air distribution piping and diffusers, sludge loading station, force main(s), valves.

#### **Effects of Damage**

#### In general-

- Damage will most likely have a minimal effect except in a situation where the sludge basins are discharging sludge.
- Loss of aeration will turn the sludge basins into facultative storage.
- Long-term loss of air may damage the diffusers.

#### Response

#### In general-

- If the sludge basins are discharging sludge then action should be taken immediately to contain the sludge and prevent it from reaching the receiving stream.
- If flood conditions exist, let water recede and then evaluate the situation. If sludge spill takes place fill out MODNR SSO/Bypass and AWR Deviation Notification forms, found in (Appendix 7). Make needed repairs and get back on line ASAP.
- Loss of air should be addressed as time permits.

### Section III

#### Contingency Plans

# Contingency Plan for Total Loss of Electrical Power

Goal: Develop strategies and to assign specific duties to plant staff: to provide for continuance of pumping at critical points of Plant; and to provide for at least primary treatment at the wastewater plant.

#### Response:

- The employee on call must come to the plant and make sure the generator is going, then get into service one aerator in each ditch and at the minimum 2 clarifiers depending on flow conditions.
- 2. Get into service the head works building equipment.
- 3. In below freezing weather check to make sure heaters in all buildings are operating properly.
- 4. Check to make sure that lift stations are operating properly.
- 5. Check status of wastewater plant.
- 6. Check all lift stations, secure by taking one of the two pumps off line, and providing emergency pumping if needed.
- Conduct a meeting to evaluate the situation and make necessary decisions as the need arises.

# Contingency Plan for High Flows

Goal: Minimize solids wash out and provide for best treatment of all influent flow.

Note: During a high flow event both oxidation ditches will be needed to prevent solids wash out.

Response: Response depends on whether one ditch is in service or if both ditches are in service. Great care must be used when, at the onset of high flows, that sludge blanket depths are monitored. If sludge blankets are rising then several options present themselves, first, more clarifiers can be placed into service, if any is out, second, #1 and #4 carrousel aerators can be shut off reduce mixing in the ditch (es), third, #3 and #6 can be taken out of service to further reduce mixing in the ditch (es), fourth, all aerators can be taken out of service (for short periods of time, i.e. up to 8 hours) to eliminate mixing in the ditch (es). Or a combination of the above measures can be used. The overall goal is to save the mixed liquor suspended solids (mlss) in the ditch from being discharged in the receiving stream. Past high flow events have demonstrated that proper management of flow through the plant can achieve good treatment (within NPDES permit standards). It is also important to note that effluent sampling should be done during high flow events to assure that NPDES permit standards are being met, and that proper documentation in the plant daily bench sheet must be maintained on all process changes to manage high flows. Whenever all the carrousel aerators are shut off to prevent solids wash out the event must be reported as a bypass at the WWTP. Always leave 1 aerator in each ditch going if at all possible, even if it means moving the oxidation ditch inlet gates to aerators #3 and #6 and running only those aerators. This will give the mixed liquor suspended solids (mlss) time to settle in the ditch before entering the clarifiers.

## **Bulking Sludge**

#### Response:

If a clarifier is bulking sludge and flows are normal for dry weather, first raise splitter box gate to the clarifier or clarifiers that are bulking, then go over to the RAS pinch valve and open them up all the way and if that doesn't calm things down then go down in the RAS basement and clean pumps.

If the pumps are not clogged but is flowing clear water then there is probably a short circuit in the clarifier caused by structural damage of the rake mechanism. Shut flow off to the clarifier and drain it and check for damage. Put other clarifiers (if one is down) on line as appropriate.

If the pump is not clogged and the discharge is dirty, then check the other clarifier to see if it is bulking as well. There could be a toxic shock. First try shutting the aerators off closest to the outlet weir gates and if that doesn't work try moving the basin inlet gates to, (#3 and #6) and running only those aerators, will minimize solid loss, and may be an appropriate response.

# Contingency Plan for Toxic Chemical Release

Toxic chemical release to the wastewater treatment plant will most likely take place in one of two forms, regardless of the toxic agent.

The first likely scenario would be the discovery, containment and cleanup of a fuel leak. This would involve participation of Lake Ozark Fire Department, Lake Ozark Emergency Response personnel and a HAZMAT unit. In order to accept this type of waste a few conditions must be met: first, the BTEX test result (if available) should be less than 2.13 mg/l; and second, the plant is operating under dry weather flow conditions. If both conditions are met then the waste can be placed into one of the basins that has been determined to be used for that purpose. The waste can then be diluted and intermittently fed into the treatment process to minimize shock on the biological community in the treatment process. Bench testing of the waste can also be performed to demonstrate if there will be problems to the bacterial community.

The second most likely scenario would be notification of a toxic release into the sewer system. This has never happened (at least the notification part) but if this condition should arise then the most likely first response would be to divert all flow to the designated basin. The second step would be to ascertain what type of toxic chemical it is (ask for MSDS information) and how much

of the toxic chemical is in the system. The third step would be notification of City or Cities, Corporate and MODNR. With data available try to estimate when the chemical will arrive at the treatment plant and how long it will take to flush the chemical from the sewer system. This information will determine the length of time all flow will need to be diverted before it is safe to resume normal flow. Again, the availability of taking one basin off line will allow temporary containment (provided dry weather flows) and the ability to further treat the chemical and either release the chemical into the treatment process or allow for its removal and disposal at another location.

### Contingency Plan for SSO's

SSO's can occur in both wet and dry weather.

Wet weather SSO's are usually caused by inflow and infiltration (I&I) of storm water into the wastewater collection system. A high rate of I&I can cause hydraulic overloading in the collection pipes and thus create an overflow in a manhole or a lift station.

Dry weather SSO's can occur due to collection pipe blockages, long term power fails, and /or lift station pump malfunction.

Whenever an SSO is observed use the Missouri Department of Natural Resources Wastewater Bypass Report Form (Appendix 7), along with the Deviation Notification Form (Appendix 7) to record the SSO event. Copies of these reports must be kept on file along with daily and monthly reports file. Wet weather bypasses at the WWTP are reported on the monthly monitoring report, and filed accordingly.

When bypasses occur at the treatment plant (flow discharged from the WWTP without proper treatment, and/or all aerators are shut off), then document the bypass in the plant daily bench sheet and start the effluent composite sampler. Bypasses from WWTP shall be noted on the monthly DMR, Daily bench sheet and Plant log book; until further notice.

#### Contingency Plan for Sludge Spills

Whenever sludge spills occur, documentation and cleanup services must begin immediately.

#### Documentation -

- Describe in the log book the location, cause and amount of the sludge spill.
- If the spill is greater than 25 gallons then treat the spill as a bypass and fill out the necessary documents (Appendix 7) and report the incident to the control authorities.

#### Clean Up -

- Treat spill area with lime
- Remove spilled material and dispose at the WWTP.
- If spill occurs on a public road way then use appropriate traffic control and warning signals as necessary

## Appendix 2

#### Chemical List / Facility Map

#### Chemicals:

#### Lab Office Building

- Hydrochloric acid
- Sulfuric acid
- Sodium Hydroxide
- Denatured Alcohol
- Weed Killer

# Maintenance Room/Shop (located in old Chlorine Tank room) or UV building.

- Chevron Gear Lube
- Transmission fluid
- Motor oil, various grades
- Anti-Freeze
- WD-40
- Dry Film Silicone
- Chain Lubricant

## Sludge Digester Blower Building

Hydrated bag Lime, 50lb bags

#### Headwork's Bldg. Storage Room

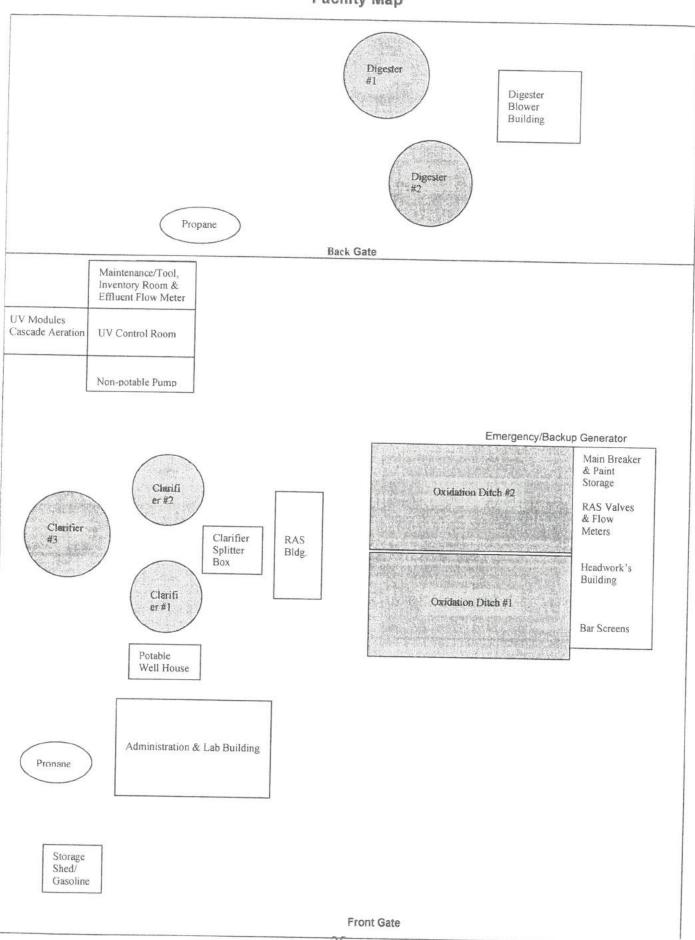

- Chevron Tube Grease
- Mystic tube Grease
- Hydraulic fluid
- Assorted cans spray paint
- Assorted cans building and grounds paint.
- Paint thinner / solvents

## Storage Shed by Admin. Bldg.

- Gasoline
- Weed eater oil

There are two 500-gallon liquid propane tanks located on the property; one is north of UV building and one west of Admin. Bldg. There is a 700-gallon diesel tank mounted under the emergency/standby generator located at the headworks building beside the electrical room. There is a 100-gallon portable diesel tank located normally stored at the sludge digester building over the hill.

# Facility Map

## Appendix 3

#### Standard Conditions for NPDES Permits

Part 1 – General Conditions, Section B – Management Requirements, Part 2. Noncompliance Notification.

A. If, for any reason, the permittee does not comply with or will be unable to comply with any daily maximum effluent limitation specified in this permit, the permittee shall provide the Department with the following information, in writing within five (5) days of becoming aware of such condition: A description of the discharge and cause of noncompliance, and the

period of noncompliance, including exact dates and times or, if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate and prevent recurrence of the non-complying discharge.

B. Twenty-four hour reporting. The permittee shall report any noncompliance, which may endanger health or the environment. Any information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. A written submission shall also be provided within 5 days of the time the permittee becomes aware of the circumstances. The Department may waive the written report on a case-by-case basis if the oral report has been received within 24 hours.

## Appendix 4

Instructions for Daily Readings & Maintenance / Daily Rounds

#### Sludge Decant Lift Station (at digesters)

Turn both pumps to off position. Turn pump 1 to hand, walk over and observe operation of pump, pump vibration, pump noise, and visually check and watch water level to see if water level is dropping. Turn pump 1 back to auto. Repeat above procedure for pump 2.

#### Decant / Dewater Lift Station (at aeration basins)

Check operation of pumps by turning both pumps to off position. Turn pump 1 to hand, walk over and observe operation of pump by looking at the discharge going into aeration basin. Listen for pump vibration, pump noise. Record pump hours daily in Admin. Bldg.

#### RAS Pump Building

One way to check operation of pumps by going over to the headwork's building and look at the RAS flumes and use the RAS pinch valves to adjust flow according to which ditch is the heaviest or lightest. If you can't adjust with valve then your next step is to clean the pumps. Clean RAS pumps as needed or before each waste. Record pump hours daily in Admin. Bldg. office on the Honeywell data recorder.

#### Final Clarifiers

Check operation of clarifiers for rotation, motor vibration, noise, and heat. Check quality of effluent discharging over the weirs. Record sludge depth, wash scum collection troughs if necessary. Exercise #1 & #2 scum troughs down if they look like they haven't been working on auto. Go to control panel on clarifier and turn scum trough switch to manual, after exercising turn back to auto. Weekly checks on the clarifiers include checking oil levels in all gear reduction units, and checking condensation drains.

#### Oxidation Ditch 1 and 2

Check operation of rotors, aerators, and discharge weir. Run down rotors on Monday, Wednesday, and Friday. Weekly checks consist of, checking the oil levels in the gear reduction units and checking the oil breathers on them also.

#### Head Works Building

Check operation of grit paddle, start grit solids pump, and observe for proper operation. To check automatic bar screen, turn bar screen switch to hand and observe for proper operation, and wash bar screen debris as needed. Check and see if the high flow floats in bar screen channels for grease or debris buildup and clean a necessary. Check operation of influent sampler/refrigerator, and record temperature. Weekly checks includes checking the grit chamber and bar screen gearboxes for proper oil levels, checking both the Vac. & Compressor pumps for proper operation and checking the suction globe on the grit solids pump for any excess buildup in the globe and/or air lines. The suction globe needs to be cleaned on a monthly basis. Check what day PM is performed.

#### Blower Building

Check oil levels and position of valves before turning on blowers then check operation of blowers. Weekly PM consist of checking of oil levels and deflection of belts.

# Outfall / UV Structure & Building

Go into UV control room and touch the screen on the front of the panel to check and see if all UV bulbs in the bank or banks that are on line at the time are working. If all are working and if there is no failures, then go out to outfall structure and visually inspect channels for any excess algae or debris buildup. Remove all banks on a monthly basis to clean and inspect bulbs, wipers, brushes and listen for any air leaks or any other types of odd noises. Also clean any algae buildup on the weir system at the end of the UV system.

## Appendix 5

# Permit Required Confined Spaces

The following list of confined spaces requires a permit to enter.

- Lake Ozark Influent Wet Well (right before flow meter)
- Osage Beach Influent Wet Well (right before flow meter)
- All Manholes
- Both Lift Station Wet Wells
- Both UV channel drain / valve pits

The safety protocol outlined in the company safety rules specifies that a confined space hazard assessment and rescue plan and a confined space entry permit both be completed and submitted to the safety coordinator whenever a permitted confined space is entered. The entry permit is included on the following pages for review; copies of the confined space hazard assessment form and the entry permit can be obtained from the safety coordinator.

# Appendix 6

Lockout-Tag out Instructions are found in site specific locations of each building inside the Facility.

There are hanging file holders with 3 ring binders in them found in each building with site specific instructions and pictures, for each piece of equipment that is located within that approximate location.

The main LOTO procedures manual is found in the Administration building as you walk in the main door. This manual has everything in the plant, that LOTO is required.

The Headwork's building LOTO binder is found in the Main Breaker room to the left of the door.

The UV building LOTO binder is found in the UV control room to the right.

The blower building LOTO binder is found to the left of the walk-in door beside electric panel.

After a piece of equipment has been determined in need of Lockout-Tag out devices you must fill out the Lockout / Tag out Permit before doing anything else. It must be approved by Supervisor or Plant Manager before doing any work. All required steps must be checked then verified complete, then the work can be started and completed.

All copies of LOTO permits must be kept and recorded on the annual log in the main LOTO manual in the Administration Building.
